Coursework

GRADUATE

Data Structures and Algorithms
Operating Systems
Database Management System
Computer Networks
Design and Analysis of Algorithms
Object Oriented Programming(**OOP**)

Skills

PROGRAMMING

C++ • Java•Javascript • GoLang

DATABASES

• MySQL • MongoDB

DEVELOPMENT

•NodeJS
•ExpressJS•ReactJS•Redux
•Linux•GitHub•Postman•REST API

Honors

• **Winner of DeepIntent's Annual Company-Wide Hackathon (April 2025)**
• **Finalist PASCKATHON (Sept. 2020)**
•**Finalist Rakuten India Hackathon (03/2021 - 04/2021)**
• **GeeksForGeeks(200+ Problems)**
• **LeetCode(200+ Problems)**

Experience

DEEPINTENT

Software Engineer

📅 April 2024 - Present| Pune

- Developed dynamic frontends using React.js, leveraging Context API for efficient state management.
- Designed and implemented RESTful APIs with Spring Boot, integrated GraphQL for flexible data querying, optimized data loaders and batch loaders for performance.
- Technology Stack: **Spring Boot, React.js, MySQL, Docker**

IDEAS REVENUE SOLUTIONS

Associate Software Engineer

📅 July 2023 – March 2024 | Pune

- Worked on UI using vaadin for G3 (revenue optimization product) and its integration with the backend services.
- Technology Stack: **Angular, Spring Boot, Vaadin, MySQL, MongoDB, Docker, AWS**

ALTAIR

Software Engineering Intern

📅 Feb 2022 – April 2023 | Remote

- Maintained low response times, with an average API response under **20 milliseconds** even under heavy concurrent loads.
- Achieved **40% reduction** in build size compared to the previous Spring Boot implementation, leading to faster deployment and improved system efficiency.
- Technology Stack used: **Golang, Docker, Avro Schema, Node.js, React.js**

SORCEO TECHNOLOGIES PVT LTD

Software Engineering Intern

📅 Aug 2021 – Nov 2021 | Remote

- Worked on building a **Vendor Management System and Auction Platform.**
- Implemented Scalable Backend API using **Express.js, Node.js , MongoDB.**
- Technology Stack used:**React.js,Node.js , MongoDB**

FOLIOSET

Software Engineering Intern

📅 July 2021 – Sept 2021 | Remote

- Implemented a robust backend API to facilitate CRUD operations for profiles, organizations entity.
- Worked on **React.js** to develop dynamic and responsive single-page applications.
- Technology Stack used: **ReactJS, ExpressJS, MongoDB , NodeJS**

Recent Projects

XENIA 🔗 | MongoDB | ExpressJS | ReactJS | Redux

📅 Feb 2021

- Annual Flagship event website recorded a footfall of **1000+ registration**.
- Implemented a scalable and high-availability backend infrastructure on AWS EC2 instances, leveraging Nginx as a load balancer.
